Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 15-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bugli et al (6,890,366 B2).

Bugli et al disclose a particle filter for a motor engine (see Abstract, col. 2, lines 23-24) comprising a housing (20), a filter body (22) located inside the housing (20), a securing element (24, col. 2, lines 52-64) with outer flange (see 56 in Fig. 3, col. 3, lines 7-11) wherein the flange is secured to the housing (20), and compensation means acting between the securing element and the housing and compensating for motions of the filter walls relative to the housing (see 120, 122, 128, 132 & 134 in Fig. 4, col. 4, lines 10-47). Bugli et al further disclose the compensation means is folded at least once

(see 120, 122, 128, 132 & 134 in Fig. 4). Claims 15-34 differ from the disclosure of Bugli et al in that the particle filter element being a cylindrical with a plurality of filter walls extending in the radial direction. Bugli et al disclose planar filtering means instead of cylindrical filter. It would have been obvious to a person having ordinary skill in the art at the time the invention was made to provide any shape of filter such as cylindrical or frustoconical instead of planar since it is well settled that mere change of shape without affecting the function of the part would have been an obvious design modification.
